Pasadena 4, Calif.

Dear Dr. Weigle,

We're just about to leave for a month in Europe, and consequently this note is written in some haste. I think I would like to have the strains 1), 2), 3), 4,5, & 7) to have on hand in case some other question of comparison comes up, and thank you very kindly for your offer of them. I feel relieved that the differences in results reside in the ^{main} lambda genotype rather than in technical problems.

With best regards,

E.M. Lederberg
